

Andrada
Mining

UNLOCKING VALUE

Corporate Presentation

AIM : ATM OTC**QB**: ATMTF

SEPTEMBER 2026

DISCLAIMER

This presentation contains summary information about Andrada Group and its subsidiaries (Andrada or Company) and their activities. The information in this presentation is a general background and does not purport to be complete or provide all information that an investor should consider when making an investment decision.

No representation or warranty, express or implied, is provided in relation to the accuracy or completeness of the information. Statements in this presentation are made only as of the date of this presentation unless otherwise stated and the information in this presentation remains subject to change without notice. The Company is not responsible for updating, nor undertakes to update, this presentation.

Certain statements contained in this presentation, including information as to the future financial or operating performance of Andrada and its projects, are forward-looking statements. Such forward-looking statements:

- Are necessarily based upon several estimates and assumptions that, while considered reasonable by Andrada, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies;
- Involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward-looking statements; and
- May include, among other things, statements regarding targets, estimates and assumptions in respect of production and prices, operating costs and results, capital expenditures, mineral reserves and mineral resources and anticipated grades and recovery rates, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions.

Andrada disclaims any intent or obligation to update publicly any forward-

looking statements whether as a result of new information, future events or results or otherwise.

The words 'believe', 'expect', 'anticipate', 'indicate', 'contemplate', 'target', 'plan', 'intends', 'continue', 'budget', 'estimate', 'may', 'will', 'schedule' and similar expressions identify forward looking statements.

Andrada is not aware of any new information or data that materially affects the information for the Mineral Resource and confirms that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

To the maximum extent permitted by law, Andrada and any of its related bodies corporate and affiliates and their officers, employees, agents, associates and advisers:

- Disclaim any obligations or undertaking to release any updates or revisions to the information to reflect any change in expectations or assumptions;
- Do not make any representation or warranty, express or implied, as to the accuracy, reliability or completeness of the information in this presentation, or likelihood of fulfilment of any forward-looking statement or any event or results expressed or implied in any forward-looking statement; and
- Disclaim all responsibility and liability for these forward-looking statements (including, without limitation, liability for negligence).

Nothing contained in this presentation constitutes investment, legal, tax or other advice. The information does not take into account the investment objectives, financial situation or particular needs of any recipient. Before making an investment decision, each recipient of this presentation should make its own assessment and take independent professional advice in relation to the information and any action taken on the basis of this presentation.

ANDRADA WELL POSITIONED FOR GROWTH

Inflection point

KEY INFLECTION POINT: ALIGNING VALUES

¹Up to US\$90 million staged growth funding in place for growth projects.

SIMPLIFIED INVESTMENT CASE

Only tin producer listed on AIM

Uis Mining Licence

Flagship cash generating tin mine

- Funded via equity and institutional lenders
- Cash flow engine for the Group
- Direct exposure and high margin asset in tin bull market
- Increasing tin production
- Funded lithium study via the European Investment Bank

01

Lithium Ridge

Significant lithium discovery

- High-grade lithium discovery
- Tin and tantalum by-products
- Additional pegmatites identified
- Third drill rig added to aggressively drill out the deposit
- Three - stage DFS funding (US\$40 million) by SQM

02

Brandberg West

Huge tungsten exposure

- Low entry access into the tungsten market
- Aggressive campaign initiated
- Additional tin and copper upside
- Two stage funding (US\$51 million by ACAM LP) for drilling and metallurgical testwork

03

Clear, focused and funded growth

DISTRICT SCALE CRITICAL MINERALS PORTFOLIO

Unrivalled project pipeline

ENTIRELY NEW MINERAL SYSTEM

Li Lithium

Ta Tantalum

Sn Tin

Cu Copper

W Tungsten

Rb Rubidium

FIRST – MOVER ADVANTAGE

Producing mine

Developing projects

Exploration projects

BASELOAD TIN EXPLORATION HAS UNLOCKED A CRITICAL MINERALS PORTFOLIO ACROSS THE ERONGO REGION

UIS MINING LICENCE : GROWTH STRATEGY I

Multi-generational polymetallic asset with potential lithium (petalite) upside

Uis Mine ore body

V1V2 Orebody

MRE : February 2025 additional resource at 77.51mt	Tin %	Lithium %	Tantalum ppm	Rubidium ppm	Niobium ppm
Grade	0.15	0.79	82	1 355	114
Contained metal (kt)	118	610 (1.51 Mt LCE)	6.4	105	8.8

Current resource:
135Mt

Continued validation drilling ongoing
on all clusters

Target resource:
200Mt

Regional exploration programme

More than **200Mt**
upside potential from
regional pegmatites

Upgraded V1V2 resource estimate enhanced measured tonnage by 30% to 27 million tonnes and lithium grade by 8% to 0.79%.

UIS GROWTH

Focused on increasing cashflow through production upgrades

FY2026

- Ore processed: 1.0 Mt
- Tin concentrate: c.1 500 t
- Contained tin: 1 100 t at CAGR of 17% over 5 years
- EBITDA at £3.3 million
- Thaisarco Offtake Agreement enhanced to exclusivity supply

Growth work streams

- Plant upgrades including Installation of ore sorters
- Lithium integration feasibility study accelerated by £2 million European Investment Bank funding
- Partnership with GTK and Metso (ProLith Project) to research scalable petalite conversion²
- Increase resource & reserve statement

Scalable expansion potential (annual)

- Ore processed → c.2.0 Mt – 2.5 Mt
- Tin concentrate → c.2 500 t – 3 000 t
- Contained tin → c.1 500t – 1 900t
- Improvement in EBITDA* margin
- Material positive free cash flow* impact as a result of increased volumes

Additional upside optionality

- Installation of ore-sorting circuit to increase tin production
- Lithium production credits expected to significantly boost EBITDA margins, due to sunk mining costs
- Potential high-grade tin ore supply expected to further increase production output

* Based on tin price of c.\$49k, excluding corporate and listing overheads. ² Refer to presentation on the Company's website : <https://andradamining.com/investors/presentations/>

LITHIUM RIDGE : GROWTH STRATEGY II – TIER1 DISCOVERY

SQM partnership unlocking lithium growth and long-term value

Locations of the current and historically completed programmes. The diamond drill holes from this campaign and the reverse circulation drill holes (green triangles) completed during the 2023 campaign.'

Section line A-A' displaying a projection of the diamond drill hole, LRD027.'

- **Highly prospective lithium asset with tin and tantalum credits**
- **Accelerated pathway to DFS through US\$40M partnership with global lithium leaders SQM³**
 - Three-stage earn-in agreement incentivising operational milestones
- **First phase of drilling over 16 500 metres (143 holes) completed in May 2026³**
- **Sampling results extended the mineralised ridge by 50% to 9km**
- **Assay results confirmed consistent high-grade lithium mineralisation to depth and valuable co-products² mainly tin and tantalum**
- **Notable intercepts over c24 metres³**
 - Lithium at 2.0% , tin 0.15% and tantalum 73 ppm
 - Mineralisation confirmed from surface to depth of 270 metres
 - Outstanding results targeted for release by end of CY2026
- **Laboratory scale flotation testwork spodumene concentrate suggest suitability for battery market³**
 - minimum spodumene recoverability at 75%
 - weighted average Li₂O grade (spodumene) at 6.84%

³Refer to announcements on the Company website: <https://andradamining.com/investors/>

BRANDBERG WEST : GROWTH STRATEGY III – POLYMETALLIC UPSIDE

Tungsten and copper to market in partnership with ACAM LP

Map displaying the localities of the reported holes.

Section line A-A' displaying a projection of the drill hole AT3 07.

BWCAM
LTD

- **Fast-tracked development with US\$51 million strategic investment from BWCAM Limited a subsidiary of ACAM LP³**
 - A two-stage earn-in agreement for up to 49% ownership
 - Funded through to completion of a Definitive Feasibility Study
 - Unconditional Namibian Competition Commission approval
- **Positive XRT ore-sorting test results and grade uplift achieved³**
 - Grade uplift from feed to concentrate including
 - tungsten from 0.24% to 1.45% : 6x uplift
 - copper from 0.73% to 2.81% : 4x uplift
 - tin from 0.31% to 2.09% : 7x uplift
- **Historical 3 000m drilled, reporting high-grade intersections³**
 - Tin up to 10.55%
 - Tungsten up to 3.53%
 - Copper up to 2.0%
- **High metal recoveries including up to 91% for tungsten and up to 94% for tin³**

³Refer to announcements on the Company website: <https://andradamining.com/investors/>

VALUE UPLIFT BRIDGE

Scalable growth pipeline

GROWTH PROJECTS

KEY CATALYSTS

Uis

- 1. Increased throughput (12 months):**
Increase in tin grade - ore-sorting & re-engineered crushing circuit.
- 2. Lithium Integration (12-18 months):**
Feasibility studies completion.

Lithium Ridge

- 1. Drilling and Metallurgical Testwork (8 months):**
Defining a maiden lithium (spodumene) resource.
- 2. Definitive Feasibility Study (12-18 months):**
Assessing the prospectivity of lithium (spodumene), tin and tantalum mining and beneficiation operations.

Brandberg West

- 1. Drilling & Metallurgical Testwork (12 – 18 months):**
Defining a maiden tin, tungsten, and copper resource.
- 2. Historical Dumps Assessment (12 – 18 months):**
Evaluation of reprocessing historical mine and plant waste dumps.
- 3. Definitive Feasibility Study (12 – 18 months);**
Assess the viability of mining and beneficiation operations.

SHAREHOLDING

Supportive equity investors

Top 10 Institutional Shareholders as at 31 August 2026	Current share issue %
The Orange Trust	14.10

STRATEGIC VALIDATION

Backed by global partners

- Recent capital raise introduced new strong institutions into a robust register
 - Greg Coffey, Talent 10 and several well-known London institutions
- Strategic partners provide technical validation
- Reduces funding risk
- Capital restructure supports focused execution
- Over US\$90 million of available, un-diluting project funding

Growth Projects Backed by Global Partners

Established Bank Relationships For Additional Project Financing

ELIMINATED LEGACY FUNDING RISK

MACRO RE-RATING

Four commodities. Four cycles. One investment opportunity

TIN USD/t

- Structural supply deficits supporting sustained elevated pricing
- Immediate cash flow strength
- As prices rise every additional tonne has a direct and immediate impact on revenue

LITHIUM USD/t

- Deep correction complete
- Positioned for next EV-driven upcycle
- Lithium gives exposure to long-term battery demand

TUNGSTEN MTU¹

- Tungsten production increasing rapidly into a strong pricing environment
- Strategic, supply-constrained critical mineral
- Tungsten adds a new, high-value revenue stream as production scales

COPPER USD/t

- Demand, driven by copper's vital role in electrification, AI, energy, defence, and infrastructure
- Expected to reach 42Mt by 2040 which is nearly 50% rise from today's levels.

LEVERAGED MULTI-COMMODITY GROWTH TRAJECTORY

¹ Mtu represents 10 kilograms of contained metal, it's the unit used to price tungsten globally.

INVESTMENT POTENTIAL

Positioned for tier-one critical minerals growth

Cash generative producing asset	• Uis Mine producing tin and tantalum concentrates : cash-generative, multi-generational , polymetallic asset • Tin production CAGR 17% over 5 years : targeting 2.5x growth in contained tin output
Quality portfolio in stable location	• Flagship Uis Mine: 135 million tonnes resource (target >200 Mt) with lithium upside • Lithium Ridge: Spodumene mineralisation over 6km strike • Brandberg West: High grade hydrothermal deposit with significant polymetallic potential
Entrenched attributes & strong partnerships	• Leadership : with deep mining track record in Africa • Strong relationships : SQM and ACAM earn-in partnership accelerating development and value growth • Stable mining friendly jurisdiction
Clear short-term value catalysts for growth	• High-grade tin ore supply : (~850 Kt at 2% Sn) through jig plant (>100% output boost) • Ore sorters : (CY2026: +15% AISC reduction), lithium integration (CY2027- CY2028: 45 ktpa concentrate), full concentrator & vertical integration • Immediate exploration upside potential :from Lithium Ridge & Brandberg West

LEVERAGED FOR SIGNIFICANT UPSIDE RESULTING IN NPV UPLIFT

INVESTMENT CASE

Leveraging on near-term catalysts for significant upside

Cash Engine

Producing tin asset in a buoyant market

Funded Growth

Strategic partners at Lithium Ridge and Brandberg West

Near-Term Catalysts

Growth workstreams unlocking value in 8 – 18 months

**CLEAR AND IMMEDIATE
PATHWAY TO
VALUE ACCRETION**

**LEVERAGED FOR SIGNIFICANT UPSIDE :
PROJECTED NPV UPLIFT at UIS + LITHIUM + BRANDBERG WEST**

APPENDIX

ANDRADA'S STRATEGIC PARTNERSHIPS

Strategic partnerships accelerating critical minerals growth

Partner	Project	Investment	Earn-in structure	Key benefits
SQM Australia SQM is a Chilean-based company listed on the NYSE and is the world's second-largest lithium producer. SQM Australia is their Australian subsidiary.	Lithium Ridge	Up to USD40m	• Current: 0% • Stage 1: 30% (18 months) • Stage 2: 40% (24 months) • Stage 3: 50% (36 months) Earns up to 50% in Grace Simba Investments (Pty) Ltd	• Partnership with global lithium leader for development expertise and market access • Extensive diamond drilling underway • Significant lithium intercepts at 3% over approximately 6 metres in initial drill results
ACAM LP (via BWCAM Limited) ACAM LP is a specialist investment firm indirectly beneficially owned by prominent investors, including Louis Bacon (Moore Strategic Ventures) and Tim Leslie.	Brandberg West	Up to USD51m	• Initial: USD10m for 30% PLUS USD1m equity subscription in Andrada • Follow-on: USD40m for additional 19% (total 49%) • Earns up to 49% in Andrada Investments (Mauritius) Ltd	• Funds accelerate exploration and feasibility studies • Historical drilling indicated polymetallic potential with high-grade Sn up to 0.80% (2 m), W 1.23% (2 m) and Cu 1.58% (2.3 m) • Positioned as Namibia's next major Cu-W-Sn source with long-term investor support

These high-profile partnerships with SQM and ACAM (total potential US\$90m staged funding) de-risk execution, bring technical/market expertise, and unlock substantial value in lithium and polymetallic assets. This positions Andrada for diversified, long-term growth in the global energy transition.

LEADERSHIP CREDIBILITY & TRACK RECORD

Experienced board and management, driving disciplined growth and operational excellence

Non-Executive Directors

GLEN PARSONS
Non-executive Chairman

- 20+ years in mining leadership and investment banking.
- Former CEO of Mariana Resources; NED at Capella Minerals.

GIDA NAKAZIBWE SEKANDI
Non-executive Director

- 28+ years in financial services and governance leadership.
- Chair at Alpha Namibia Renewable Energy
- Former chair of SEC, Capricorn Group.

LAURENCE ROBB
Non-executive Director

- Globally recognised geologist with 40+ years' experience.
- Professor at University of Oxford; former Technical Director, Lerama Resources.

Executive Directors & C-Suite Management

ANTHONY VILJOEN
Chief Executive Officer & Executive Director : Entrepreneur

- 21+ years in African mining entrepreneurship.
- Co-founder of Bushveld Minerals and former CEO of Lemur Resources.

HITEN OOKA
Chief Financial Officer & Executive Director: Chartered Accountant

- 16+ years in mining finance, tax, and capital-market strategy.
- Previously with Bushveld Minerals, Trafigura, Eurasian Resources Group and Rand Uranium.

CHRIS SMITH
Chief Operating Officer : Chemist

- 37+ years in mining operations and process optimisation.
- Experienced GM with track record in sustainable production performance.

FRANS VAN DAALEN
Chief Strategy Officer : Mining Engineer

- Mining engineer with 21+ years' operational and project experience.
- Co-founder of VBKom Engineering Consultancy.

Diverse expertise across core disciplines

- Leadership team brings deep experience in:
 - Mining and geology
 - Chemistry and engineering
 - Finance and capital markets

Proven track record

- Successfully delivered projects across Africa
- Established value-enhancing partnerships
- Consistent focus on operational efficiency and growth

Strategic leadership for long-term success

- Clear vision and execution capabilities
- Strong governance and ESG oversight
- Ability to adapt and thrive in dynamic commodity markets

MARKET CONTEXT : TIN

Long-term demand driven by increased metal utilisation of technology

Concentrated production - fragile supply chains - rising geopolitical risk

Tin demand forecast
(Refined Tin Use, '000 tonnes)

Solar
40% y-on-y growth

- Solar ribbon
- Junction boxes
- PV electronics

Electric vehicles

Market share already 15% of car sales;
Forecast as high as 50% in 2030

- Power electronics
- Wiring & connectors
- Charging stations

5G infrastructure

10x data storage requirements by 2030

- Macro base stations
- mmWave small cells
- Power amplifiers

Source: ITA Tin Industry Review

SUPPLY CONSTRAINTS

China dominance

- China increased domestic tin production by 20% to 30% between 2020 –2022 in response to Indonesia's export controls and post-pandemic industrial demand

Myanmar volatility

- In mid-2023, the United Wa State Army (UWSA) halted tin mining and exports in key districts amid regulatory and licensing upgrades.
- Mining resumed in July 2025 following infrastructure improvements; however, uncertainty remains.

Indonesia's instability

- A major global source of refined and mined tin at 18% to 21%,
- Becoming an increasingly unpredictable exporter due to shifting policy and trade restrictions

Figure 4: China's tin demand vs. local mined output (ktpa)
...switch to net-importer 15yrs ago, as 'Super Cycle' kicked in

Source: Refinitiv Eikon/WBMS, Bloomberg, Panmure Liberum

Figure 15: Tin vs. other Base Metals' price indices

Source: Bloomberg; note: based on LME cash

MARKET CONTEXT : TANTALUM

Critical superalloy with broad industrial demand and limited global supply

Long-term demand driven by technological innovation

- **Strategic alloy:** critical for advanced capacitors in mobile and computing technologies
- **Supply-demand gap:** global demand forecast to increase to 3 517 tonnes by 2028 against limited new supply sources

Why tantalum

- **High strength & conductivity** : exceptional electrical properties and corrosion resistance
- **Biocompatibility** : ideal for surgical implants and medical devices
- **Heat & chemical resistance** : suitable for harsh industrial applications

Key end-use sectors

- **Electronics:** Smartphones, laptops, high-performance computing
- **Aerospace & Defence:** Jet engines, missiles, high-temperature shielding
- **Healthcare:** Implants, pacemakers, surgical instruments
- **Industrial & Chemical:** Acid-resistant processing equipment and carbide tooling

Tantalum demand forecast CAGR (%)

Source: Roskill / Benchmark

Demand growth forecast to increase to 5.2 million tonnes LCE by 2040

- Global lithium **demand is expected to increase** 1.3Mt (2022) to 5.2Mt LCE by 2040
- One of the **fastest-growing commodities**, driven by the rise of rechargeable lithium-ion batteries
- Key enabler of **large-scale energy storage** and **renewable grid integration**
- Asia leads consumption (>90%), with **China as the largest consumer**
- **Production and usage expanding into new regions**
 - Early momentum in Europe and North America
 - New projects underway in South America, the Middle East, and Africa
- **EV sector forecasted to be the dominant driver of battery deployment** through 2040.

Towards 2040, the increased adoption of large-scale utility battery ESS projects will drive battery demand to new levels within Europe and reshape the market share between residential, commercial and utility-scale installations.

Source: International Lithium Association (Project Blue) : Lithium 2040 – The element shaping our future - May 2025

MARKET CONTEXT : TUNGSTEN & COPPER

Byproduct upside supported by strong price environments

Tungsten

Source: Fastmarkets

Tungsten price steadily increasing in response to Chinese export controls

- Tungsten is a crucial defence and technology metal, valued for its hardness, density and high melting point
- China currently controls ~83% of global supply, and implemented export 'controls' in February 2025, significantly disrupting supply and availability of material
- Tungsten APT price is up over 150% YTD, and set to continue rising with consumption forecasted to grow 2%-3% CAGR over next decade, with limited supply outside China

Copper

Source: London Metal Exchange

Copper price surging as demand outstrips supply

- Demand, driven by copper's vital role in electrification, AI, energy, defence, and infrastructure, expected to reach 42Mt by 2040 which is nearly 50% rise from today's levels.
- Copper production is expected to peak in 2030 at ~33Mt, as existing mines reach end of life and new projects struggle to come online
- Forecasted supply deficit supports a strong price environment, contributing to favourable project economics.

SUSTAINABILITY AND GOVERNANCE AS VALUE DRIVERS

Building a resilient, responsible mining future

Responsible growth

ZERO LTIFR

Lost-time injury
rate

- ESG principles embedded in operations
- 25% reduction in total injury frequency rate
- ICMM score improved from 41% to 54%

People and communities

98% Local

Namibian
workforce

- Workforce expanded to 555 employees
- Zero community grievances recorded
- IFC-aligned grievance mechanism

Environmental stewardship

4 Programs

Active initiatives

- Advanced Nature Roadmap implementation
- Renewable electricity integration
- Comprehensive climate strategy adopted

Governance and systems

Enhanced

ESG oversight

- Strengthened policy framework
- Improved data assurance processes
- Supply Chain & Human Rights Framework
